ABOUT ME

I am a self-taught web developer with one year experience as a fulltime junior member of an ambitious and dynamic startup. Although I was enjoying my job, I wanted a new challenge to step up my game so I came to Denmark to study Computer Science. Now I am looking for a part-time job, where I can put my knowledge into practice and get a real world feedback.

I feel best in a informal environment with emphasis on team-work, code quality and cutting-edge technologies.

EXPERIENCE

eDocu

Junior Developer

since February 2015

Using stickers with QR code, eDocu brings the right information on the spot.

eDocu is a robust web application based on dockerized microservices and the **MEAN** stack. My main responsibilities are development of new features using **AngularJS** and **UI** design.

go-ok

Skill based volunteer

since June 2015

go-ok is a NGO monitoring wheelchair accessibillity. I am a part of two-person team developing a browser game with **Meteor** and **AngularJS**. The goal is to gamify discovery of parking spots for disabled through Google Streetview.
