ABOUT ME

While feeling unfulfilled and disappointed by my previous university studies, I found myself very fascinated by web development and I started to participate in all on-line classes and tutorials I could find. I realized the immense potential of this field and for the last few months I spent majority of my free time learning to code in order to become a web developer. Now I am confident to say that I have finally found my true passion and I'm looking for an opportunity to work with and learn from experienced professionals.
